

Magic Power Cube 3000 OPERATING INSTRUCTIONS

Diagram

Included Items

- 1 HALO Magic Power Cube 3000
- 1 HALO Charge It Charge Me™ cable
- 1 30-pin adapter tip
- 1 Carrying pouch
- Operating Instructions/ Warranty

Getting Started

Charge the *HALO Magic Power Cube 3000* until the LED displays solid green (no lights should be flashing). This will take up to six hours and will vary depending on whether the unit is charged from a wall outlet or car.

To Turn On/Off the HALO Magic Power Cube 3000

The HALO charger will automatically turn on and begin charging as soon as it is plugged into your personal electronic device. To preserve the battery, the HALO charger will automatically turn off after two minutes if your personal electronic device is fully charged and no longer drawing power. The unit may also be turned on/off by manually pressing and holding the power button for three seconds.

Power Indicator/Battery Status

When charging/discharging, the LED will flash one of the following colors indicating the amount of battery level remaining: red (1%–33%), orange (34%–66%) or green (67%–99%). The power status can also be checked by pressing and releasing the power button when the unit is not in use. When the HALO charger is 100% charged, the green LED will stop blinking and turn solid green.

Charging the HALO Magic Power Cube 3000

Charge your HALO charger using the built-in wall or car plug. If charging indoors, plug the wall adapter into a wall outlet. If charging on the go, plug the car adapter into the car lighter outlet. Depending on how much charge your HALO charger already has, the charging indicator light will flash green, orange, or red, indicating your HALO charger is properly charging.

Charging Your Personal Electronic Device

Charge your personal electronic device using the supplied *HALO Charge It Charge Me* cable. Plug the USB connector into your HALO charger. Insert the provided appropriate tip into your personal electronic device and charging will begin automatically. You may also use your own USB cable that was supplied with your personal electronic device. While your personal electronic device is charging, the LEDs will continue to illuminate, indicating the HALO charger's remaining capacity. The red LED lights will begin to flash prior to the HALO charger running out of power.

Note: To charge both the HALO charger and your personal electronic device, first plug the HALO charger into either a wall outlet or car outlet. Using the supplied *HALO Charge It Charge Me* cable, connect your personal electronic device to the HALO charger and your personal electronic device will automatically begin to charge. Once your personal electronic device is fully charged, the HALO charger will then begin to charge itself.

Storing/Handling/Cleaning the HALO Magic Power Cube 3000

- Do not get wet or store in extreme temperature conditions.
- Do not disassemble the HALO charger or attempt to repair it.
- Use a soft cloth with soap to clean the exterior of your HALO charger. Do not use liquid detergent or chemicals of any kind.

Safety Precautions

This HALO charger has been designed and manufactured to ensure personal safety. Please read the following carefully before using. Incorrect operation or incompatibility with your personal electronic device may result in reduced battery performance or damage.

- Carefully read the operating instructions, and use the HALO charger correctly.
- Caution: The lithium-ion rechargeable battery used in this charging device may present a risk of fire or chemical burn if mistreated. Do not disassemble, expose to heat above 212°F (100°C) or incinerate.
- Misusing or incorrectly connecting the HALO charger may cause electric shock to users and damage equipment. The HALO charger may become warm under extended high power operation. During operation, keep the HALO charger away from materials that may be affected by these tempera tures.
- When used correctly, lithium-ion rechargeable batteries provide a safe and dependable source of portable power.
 However, if they are misused or abused, this may result in leakage, burns, fire or explosion, causing personal injury or damage to other devices.
- Do not disassemble the HALO charger. There are no userserviceable parts inside. Incorrect reassembly may result in shock or fire hazard.
- Do not drop or subject to strong impacts. Do not operate the HALO charger if it has received a sharp blow, or other wise been damaged in any way.
- Do not expose the HALO charger to moisture, water, rain, or snow.

- Do not insert any object into the ports or openings of the HALO charger.
- Never charge the HALO charger unattended.
- There is a risk of the batteries exploding, overheating, or igniting. Do not disassemble, modify, heat or short-circuit the batteries. Do not place in fire or leave in hot places. Do not expose to direct sunlight.
- Only charge the HALO charger by the specified method with the specified USB cable.
- In the unlikely event of leakage or explosion use sand or a chemical fire extinguisher.
- Batteries should be recycled or disposed of as per state and local guidelines.

Specifications

Battery: Rechargeable Lithium Polymer

Power Capacity: 3000mAh

Output Volt: DC 5V

Rated AC Input: 110V~240V Rated DC Input: 12V~24V Output Voltage (DC): 1000mA

FCC Compliance Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

15.21

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

15.105(b)

This equipment has been tested and found to comply with the limits for Class B digital devices, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Limited Warranty

HALO2CLOUD, LLC warrants its products to be free from defects in material and workmanship under normal use conditions, as follows:

- During the first one year from date of purchase, HALO2CLOUD, LLC will repair or replace the defective product.
- HALO2CLOUD, LLC will, subject to inspection, repair the defective product or replace it with a new or reconditioned unit. The return must be accompanied by a Return Materials Authorization (RMA) number to be issued upon request and must be shipped prepaid. A shipping rebate will only be extended to the customer in the event that a defect in material or workmanship is confirmed.
- Warranty is void if the product has been improperly handled or misused in any way, or if the label and/or bar coded warranty label has been removed or tampered with.
- Warranty returns require a check for \$14.95 for processing and handling made payable to HALO2CLOUD, LLC.
- Where applicable, all requests for warranty returns must be accompanied by a proof of purchase and be sent to HALO2CLOUD, LLC (www.halo2cloud.com).
- The warranty does not extend to the electronic equipment that is used or which incorporates with any of our products and accessories. HALO2CLOUD, LLC shall not be held responsible for the improper use of its products.
